Grolier Interactive, Inc.

BANZAI BUG
Version 1.01
Release Notes

This version of Banzai Bug addresses the "no valid z-buffers…"
error with video hardware based on the S3 Virge, S3 Virge VX, and ATI
Rage II chipsets.

Version 1.01 also removes the 3D accelerator option from the game.
Currently, Banzai Bug is not configured for any specific 3D video cards. It
will run on any card supporting DirectX 3.0 correctly.
