GraphPower™

FEROX MICROSYSTEMS INC.

GraphPower is an easy-to-use yet powerful software program that gives you immediate access to business graphics. Using data entered at the keyboard, you can create multicolor graphics on paper or transparencies, ready for use in reports, presentations, and for "camera ready" reproduction.

With GraphPower you can do your complete presentation and report — from graphs to text to data. Choose from pie graphs, bar graphs, stacked and side-by-side bar graphs, line graphs, text charts, and financial reports.

With up to 8 rows of data in up to 260 columns, you can chart your accounts receivable every business day for a year. Better yet, you can overlay graphs, putting a line graph over a bar graph, for example.

Line graphs can be drawn with any one of six different patterns. Bar and pie graphs can be open, solid, or in grid patterns. Each graph can be labeled in many ways. Any word or line of text can be a different size, slant, or color from any other.

You can create a graph simply by answering eight questions from menus. However, once you start to use the software you may want to access some of the more advanced features of the package. It is up to you!

GraphPower has tools for easy data entry and manipulation. You can save and retrieve data and graph files. Addition, subtraction, multiplication, and division are standard. You can extract information from one or more files and consolidate it into another one. In short, you can easily rearrange and transform data when doing a new graph.

GraphPower lets you include four graphs in quadrants.

Text slides add a professional touch to your reports and presentations.

Hardware Requirements

Below are recommended system configurations. Consult the software supplier about other configurations.

Apple II System

Apple II Plus or IIe with 64K memory
Apple Monitor /// or equivalent
Two Apple Disk II Drives and Apple II Controller
Apple Super Serial Card
Male-to-Male RS-232-C Cable
HP 7470 Plotter, Option 001

Apple /// System

Apple /// with 128K memory
Apple Monitor ///
One Apple Disk /// Drive as drive 2
Apple /// Modem Eliminator Cable
Male-to-Male RS-232-C Cable
HP 7470 Plotter, Option 001
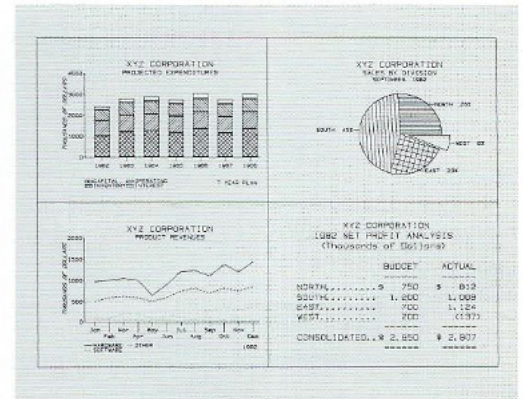

Ordering Information

GraphPower for the Apple II
(Order P/N 213)
Suggested retail $295.00

GraphPower for the Apple ///
(Order P/N 214)
Suggested retail $295.00
