

Number One

A user-oriented data-base retrieval system <i>A. U. Jones</i>	4
An APL interpreter and system for a small computer <i>M. Alfonseca, M. L. Tavera, and R. Casajuana</i>	18
The IBM 5100 and the Research Device Coupler—A personal laboratory automation system <i>H. Cole and A. A. Guido</i>	41
A method of programming measurement and estimation <i>C. E. Walston and C. P. Felix</i>	54

Number Two

The information management system IMS/VS <i>W. C. McGee</i>	
Part I General structure and operation	84
Part II Data base facilities	96
Part III Batch processing facilities	123
Part IV Data communication facilities	136
Part V Transaction processing facilities	148
A high-performance DB/DC system <i>J. E. Siwiec</i>	169

Volume 16 1977

Number Three

Data structures and data accessing in data base systems past, present, future <i>M. E. Senko</i>	208
CICS/VS and its role in Systems Network Architecture <i>D. J. Eade, P. Homan, and J. H. Jones</i>	258
Automated logical data base design: Concepts and applications <i>N. Raver and G. U. Hubbard</i>	287

Number Four

Query-by-Example: a data base language <i>M. M. Zloof</i>	324
Design techniques for a user controlled DB/DC system <i>G. F. Heyne and C. J. Daniel</i>	344
Storage and access in relational data bases <i>M. W. Blasgen and K. P. Eswaran</i>	363
MARC: MVS archival storage and recovery program <i>J. P. Considine and J. J. Myers</i>	378
An input-output econometric model <i>K. S. Sarma</i>	398
