# The Sperry Video Terminal (SVT) 1210 Specification

The Sperry Video Terminal 1210 combines simple styling with industry standard control sequences to provide an economically attractive video display terminal.

The SVT 1210 complies with the ANSI X3.64 standard for control sequences, comes equipped with an easy-to-use English language set up menu and provides many industry standard features, such as VT-52 emulation, a built-in printer port and 7-bit character encoding.

Ergonomic characteristics of the SVT 1210 include a non-glare screen, tilt-swivel base and low profile detachable keyboard designed to 30mm lightweight standards. The keyboard uses a VT-100 style layout and has adjustable legs for setting the keying angle.

The built-in flexibility of the SPERRY SVT 1210 makes it the right choice for economy and versatility.
