IBM NetVista 2200w Phase I

Creating an RDP session with Phase I Functionality

Creating an RDP connection

Follow these steps to create an RDP connection:

◆ From the WTS Connection Wizard dialog box, enter a name for the new connection and either the network name or IP address of the terminal server, and click **Nex**t.

　◆ If you plan to use this connection across a slow network connection, check the **Low Speed Connection** box.

Creating an RDP connection

♦ To enable automatic logon for the new connection, check the **Automatic Logon** box, enter the correct values for the required fields, and then click **Nex**t. If you do not plan to enable automatic logon, leave the fields blank, and click **Nex**t.

Creating an RDP connection

♦Select the display interface for the new connection, and click **Nex**t. Your selection determines the display interface that runs when you connect and logon to your terminal server. You have the following options:

   ♦**Desktop--**The terminal server desktop displays when you connect and logon successfully to your terminal server.

   ♦**Application file name --** A specific application automatically runs and displays its graphical user interface when you connect and logon successfully to your terminal server.

Creating an RDP connection

◆Click **Finish** to save your new terminal server connection.

- ◆The Terminal Connection Manager window lists the new RDP connection on both the Connections tab and the Configure tab.
- ◆To connect to a terminal server through an RDP connection, see " Connecting to a terminal server" on page 22 of the Reference Guide for information.
- ◆To edit an RDP connection, see " Editing an RDP connection" on page 28 of the Reference Guide for information.
