

NAME

pphdrtell - return tell value for pattern header

SYNOPSIS

```
#include <ppsubs.h>
```

```
long pphdrtell()
```

DESCRIPTION

Pphdrtell() is a macro defined in <ppsubs.h> and always returns the tell value for the start of the pattern file header (0L) which is the same for any pattern file. The tell value can be used by lseek(2) or fseek(3).

SEE ALSO

lseek(2), fseek(3), pattern(5L)
