

NAME

oparm - Office Parameter File

DESCRIPTION

The oparm file in each office directory describes information pertaining to that office. The layout of the oparm file is identical to that of the chldata(V) file with the exception that the "c_name" element contains the "office.channel" name in the chldata file, but only the office name in the oparm file.

FILES

<office directory>/oparm /compool/chldata.h
